PEDROSS

LEISTENHERSTELLUNG - WOODEN PROFILES - LISTELLI IN LEGNO

Tradition meets innovation

For over 50 years, our family-owned company has been active in the area of flooring accessories and has grown from a trade workshop into the company we are today, with partners and customers all around the world. Our success would not have been possible without strong loyalty to our values and a keen innovative spirit: Our own in-house research and development department is constantly working on new and technically sophisticated solutions that enable our customers and partners to stay one step ahead of the competition.

REALLY REMARKABLE - REMARKABLY REAL

The use of digital printing in the production of floor mouldings opens up creative possibilities for interior design that were never before dreamed of. Explore the countless advantages for yourself and discover new inspiration for your personal project:

Remarkably versatile.

Let your creative spirit run free – if it can be imagined, then it can be created. A printable file is all that's needed for printing the design. This enables maximum production flexibility that saves time and costs, even for smaller orders.

Remarkably unique.

Whether decorating the mouldings with your company's logo, with a scanned pattern or with your own hand-drawn illustration – You can be certain: The mouldings produced using our digital printing process are truly one-of-a-kind.

Remarkably innovative.

PEDROSS is the first manufacturer of mouldings to digitally print not only laminate, but also veneer, thereby offering our customers entirely new design possibilities, even in the area of multi-layered parquet: Welcome to the future of moulding production!

Emphasize character. Accentuate individuality. Add a subtle highlight to your interior design or go bold and create exciting contrasts. Whatever your aim: PEDROSS digital printing will accompany you in your project and will provide you with exclusive, one-of-a-kind mouldings.

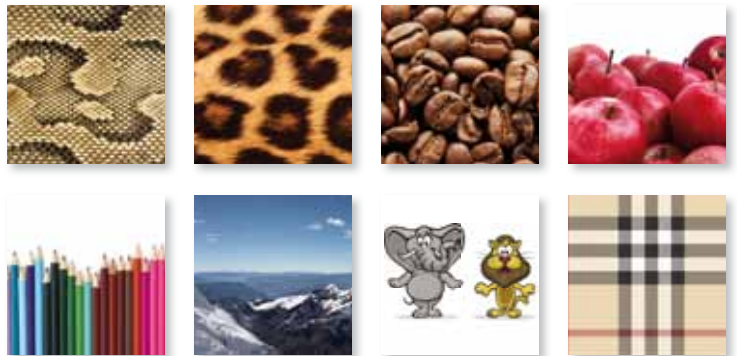

Technology that inspires

With a high-speed printer developed specially for PEDROSS that is unrivalled anywhere in the world, fully digital and contact-free printing is now possible for a wide range of surfaces. The entire range of hues can be reproduced in true colour and photorealistic quality using just four primary colours.

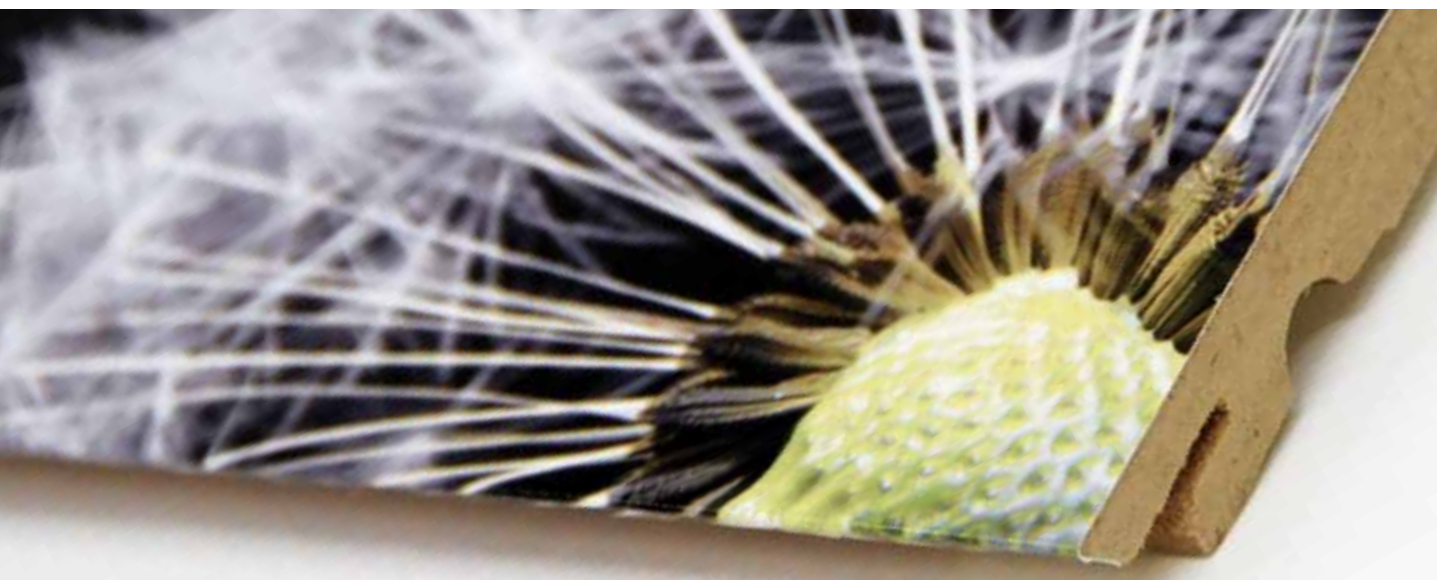

ANYTHING BUT ORDINARY

Be your own designer: Turn your favourite painting into a stylish eye-catcher for your living room. Transform your bedroom into a dream from Arabian Nights with ornate oriental patterns. Add some variety and adventure to your children's room with lovable and playful animal or letter motifs. Underscore the unique character of a designer piece of furniture with a matching pattern on your mouldings. Whether striking and unusual or glamorous and dignified - the results are sure to impress!

DAZZLINGLY SHARP

The endless variety of motifs is complemented by a further, decisive advantage: Realistic and high-detail 3D appearance. Thanks to the state of the art, custom digital printing system, all motifs – photos, graphics, patterns and text – are available at a level of perfection never before seen. This results in extremely high-resolution, high-contrast patterns and photo motifs whose quality, brilliance, rich colours and astonishingly high-precision reproduction of details are sure to impress. Take a closer look and discover new aspects to your mouldings every day!

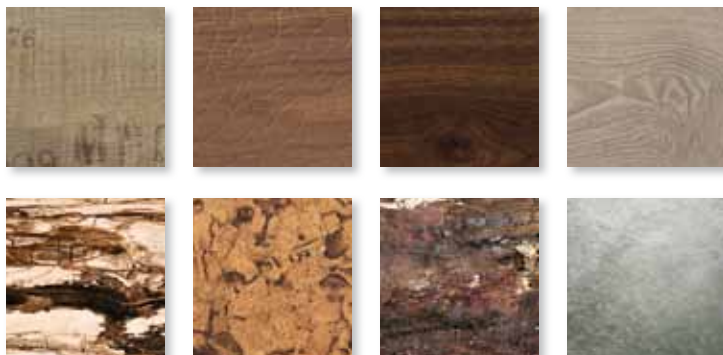

Intensely realistic

The innovative printing process is notable for its unusually high level of detail and dazzlingly realistic three dimensional images: Motifs appear so clearly that those viewing the final product will have a difficult time differentiating them from the real thing.

PERFECT HARMONY

Digital printing may have its eccentric sides – however, its greatest of abilities truly shine through when the aim is to achieve perfect harmony. Finding exactly the right moulding to match your floor is now as easy as taking a digital photo: Your floor texture – whether wood, stone, plastic or a custom texture – is simply scanned and transferred 1:1 onto your mouldings. In 3D quality, of course.

The advantages are obvious: Whereas finding a moulding which at least came close to resembling your floor material was the goal of yesterday, today you can now find the perfect moulding to accurately match your floor. This means there is no compromise even when dealing with the rarest and most valuable of floor materials!

This flyer is printed on FSC certified paper.
